

ICAO CIRCULAR ON UNMANNED AIRCRAFT SYSTEMS

Draft Table of Contents

Foreword

Brief explanation on purpose of the Circular
Invitation to States to provide on-going feedback, input

References

List of ICAO, State, Industry documents

Abbreviations

Explanation of Terms

Chapter 1. Introduction

History of the issue – ICAO State Letter to the present
Planning for updating
Circular's position in the regulatory context
Relation to other ICAO Documents, hierarchy, etc.
ICAO strategy for downstream SARPs/PANS development

Chapter 2. Overview of UAS

UAS recent global developments
UAS as aircraft
UAS system concept
Requirement for ICAO guidance/policy
UAS potential most suited civil applications
Expected evolution of the UAS civil market
International operations potential

Chapter 3. Relationship to the ICAO ATM Operational Concept

Chapter 4. Air Traffic Management

4.1 Safety

4.2 Personnel Licensing

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

4.3 Rules of the Air

- existing ICAO SARPs/Guidance
- UAS Specificities

- Statement of Issue(s)
- Current National Approaches

4.4 Air Traffic Services

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

4.5 Search and Rescue

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

4.6 Aerodromes

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

Chapter 5. Flight safety

5.1 Safety

5.2 Personnel Licensing

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

5.3 Airworthiness of Aircraft

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

5.4 Operation of Aircraft

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

5.5 The Safe Transport of Dangerous Goods by Air

- existing ICAO SARPs/Guidance
- UAS Specificities

- Statement of Issue(s)
- Current National Approaches

5.6 Aircraft Accident and Incident Investigation

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

5.7 Environmental Protection

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

Chapter 6. Supporting requirements

6.1 Legal

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.2 Navigation, Communication and Surveillance

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.3 Aeronautical Telecommunications

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.4 Meteorological Service for International Air Navigation

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.5 Aeronautical Information Services

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.6 Aeronautical Charts

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.7 Units of Measurement to be Used in Air and Ground Operations

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.8 Security — Safeguarding International Civil Aviation against Acts of Unlawful Interference

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.9 Aircraft Nationality and Registration Marks

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.10 Facilitation

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

6.11 Aerodrome and Service Charges

- existing ICAO SARPs/Guidance
- UAS Specificities
- Statement of Issue(s)
- Current National Approaches

Chapter 7. State Aircraft

7.1 Military UAS

7.2 Customs and Police UAS

Chapter 8. Standards-making organizations

8.1 EUROCAE/RTCA

8.2 Other

Appendices/attachments

- a) Examples of State UAS initiatives
- b) Specific examples of actual UAS civil/commercial applications (business case, ATM aspects, operational concept). Pipeline survey, agriculture.....
- c) Specific examples of actual State UAS applications (business case, ATM aspects, operational concept). Border patrol, forest fires.....
- d) EUROCONTROL OAT specifications (military UAVs)
- e) Other issues: insurance, “wassenaar convention (?)”, etc.
- f) Guidance to States on promulgating societal awareness

2. Diagrams

- a) UAS system architecture
- b) Communications links

3. Bibliography (UVSI)

- a) Links to various www.xxxx.
- b) National publications (e.g.: UK CAA, FAA, EUROCONTROL/JAA TF, Australia, France, Asian States, South America)
- c) EUROCAE/RTCA Docs and websites
